

Argano SUPPLY CHAIN PERFORMANCE IMPROVEMENT

WHY PARTNER WITH ARGANO?

20+ YEARS

Specializing exclusively with SAP-run businesses gives us unparalleled expertise, tools and accelerators that help you see results within weeks, not years. Our high standards give you better supply chain results.

GLOBAL REACH

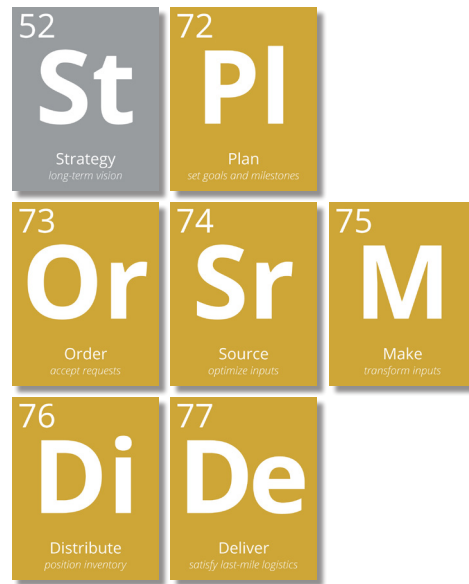

Argano has successfully implemented hundreds of SAP solutions in dozens of countries and works with Fortune 500 clients in the CPG, chemical, life sciences, industrial, retail, high tech and discrete manufacturing industries, to name a few.

GOLD PARTNER

Argano offers end-to-end support for the full range of SAP products covering supply chain planning and execution, actively partnering with SAP to deliver better solutions to its customs. An effort worthy of a Gold Partner.

Building Blocks of Supply Chain Transformation

- Strategize—value-stream mapping and analysis to efficiently restructure operations
- Plan—integrated business planning optimizes supply, demand and inventory.
- Order—analyze cost-to-serve and product profitability for perfect order execution.
- Source—strategy and roadmap development to achieve procurement excellence.
- Make—digital plant transformation and flow analysis for execution effectiveness.
- Distribute—strategic omnichannel and network analysis for optimized fulfillment.
- Deliver—logistics and transportation strategy and digitization to recover cost and value.

Enabling Transformation

Experienced Experts, Outcome-Based Alignment and Practical Operator Mindset

Most firms list supply chain as an offering, but supply chain is what we DO. Our experienced practitioners implement practical and tailored solutions that create real and sustainable business outcomes. Our engagements align with predetermined outcomes, and all our efforts are performed with the intention of reaching those measurable goals. Our experts all served as operators and practitioners themselves at some point, which is why we understand how to create real change.

Fix. Build. Perform.

Delivering End-to-End Supply Chain Support to Achieve Outcomes that Matter

Poor OTIF, excess inventory, and stock outs are all symptoms of a broken supply chain. Our accelerated outcomes program rapidly diagnoses and fixes these underlying issues. For more than 30 years, our experts have been successfully building global supply chains. Separate yourself from the competition by leveraging the deep experience of Argano to fine-tune your tools and capabilities, creating unique supply chain advantages that set you apart from your competition.

The Power of Assessment

We offer specific analyses and solutions that identify the ways you can make leap-frog advancements or squeeze more performance improvement from your existing systems. Clients leverage our capabilities to achieve both pinpoint-accurate results and broad systematic transformations. Either way, our team works closely with your planners, managers and executives to put your supply chain under a microscope and identify the path to your desired outcomes.
